ARULARASI U

8778433040 | arularasiudayakumar@gmail.com | linkedin.com/in/arularasi-udayakumar | github.com/Arularasi-17 | Chennai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Computer Science (Cyber Security) undergraduate with hands-on exposure to network security, ethical hacking, and web development gained through internships and academic projects. Practiced with vulnerability assessment and traffic analysis tools including Wireshark, Nmap, Burp Suite, Kali Linux, and Metasploit, alongside core security concepts such as the CIA triad, authentication, and encryption. Disciplined, adaptive, and collaborative, with a strong interest in building a career in cybersecurity.

EDUCATION

B.E. Computer Science & Engineering (Cyber Security) *Expected 2027*
Saveetha Engineering College, Chennai, Tamil Nadu CGPA: 8.58

EXPERIENCE

Ethical Hacking Intern Zybeak Technologies — Anna Nagar West, Chennai *Jan 2025*

- Practiced ethical hacking fundamentals under mentorship, including reconnaissance, scanning, and vulnerability identification using Nmap, Wireshark, Burp Suite, and Metasploit.
- Applied core security concepts — the CIA triad, common threat types (phishing, malware, DoS), and authentication/authorization principles — to sample security assessments.
- Analyzed live network traffic with Wireshark to identify and interpret packet-level anomalies.

Web Development Intern Trios Technologies — Ashok Nagar, Chennai *Jun 2023*

- Built and styled web page components using HTML and CSS as part of a collaborative development team.
- Strengthened front-end fundamentals and technical communication through hands-on project work and team collaboration.

PROJECTS

Lightweight ML-Based Intrusion Detection System for IoT Healthcare Devices

- Contributed to the design of a machine-learning-based intrusion detection system aimed at securing IoT healthcare devices from common network attack types.
- Applied foundational cybersecurity and machine learning concepts to help identify anomalous behavior in simulated device traffic.

CERTIFICATIONS

Introduction to IoT and Digital Transformation
Cisco Networking Academy

Unix/Linux OS Fundamentals
Infosys Springboard

Introduction to Cryptography for Beginners

SKILLS

Languages: Python, Java (Basics)

Web & Frameworks: HTML, CSS

Networking & Cybersecurity: Kali Linux, Wireshark, Metasploit (Basic), Burp Suite, Nmap, Threats & Attacks (Phishing, Malware, DoS), CIA Triad, Authentication & Authorization, Encryption Basics

Tools: Power BI

Core Strengths: Responsible & Disciplined, Quick Learner & Adaptive, Teamwork & Collaboration, Analytical Thinking
